Activity Name: Workshop

Title Name: Android Application Development

Date of Event:23/03/2017 TO 25/03/2017

Name of Organizing Department: Department of CSE and IT

Name of coordinators: D. Ramana Kumar Associate Professor

S. Sreenivas Assistant Professor

Name & Designation of Resource Person:Mr.Md.Shabbir

Session: 10:00 A.M TO 12:00 P.M

Workshop Summary: Android software development is the process by which applications are created for devices running the Android operating system. Google states that "Android apps can be written using Kotlin, Java, and C++ languages" using the Android software development kit (SDK), while using other languages is also possible. The official language for Android development is Java. Large parts of Android are written in Java and its APIs are designed to be called primarily from Java. It is possible to develop C and C++ app using the Android Native Development Kit (NDK), however it isn't something that Google promotes.

About the College

As an Institute committed to quality education, MEST aims at providing learning with a Technology- edge. It endeavors to provide constant training to its students to help them evolve as competent professionals in the highly competitive world. Right from its inception in 2001, it has been using itself to meet this objective. A new civilization is emerging on our line. The online brings with it a new way of working. Millions are already using their lives to the rhythms of tomorrow.

About CSE & IT Dept

The Department of CSE & IT guards the best of knowledge of students effectively which runs to higher level of competency required by the industry. With its experienced faculty members having excellent academic backgrounds it runs student applications classroom lectures with computer aided demonstrations making the learning a rich and rewarding experience.

About the Workshop

Android software development is the process by which applications are created for devices running the Android operating system. "Android apps can be written using Kotlin, Java, and C++ languages" using the Android software development kit (SDK), while using other languages is also possible. All non-JVM languages such as Go, JavaScript, C, C++ or assembly, need the help of JVM language code, that may be supplied by tool like with various APIs support. Some programming languages and tools offer cross-platform app support (i.e. for both Android and iOS).
