

Workshop detail year: 2017

Activity Name: Workshop

Title Name: Block chain Technologies

Date of Event:05/01/2017

Name of Organizing Department: Department of CSE and IT

Name of coordinators: D. Ramana Kumar Associate Professor

S. Sreenivas Assistant Professor

Name & Designation of Resource Person: Mr. Raghunath

Session: 10:00 A.M TO 12:00 P.M

Workshop Summary: Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system. A blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the blockchain. Business runs on information. The faster it's received and the more accurate it is, the better. Blockchain is ideal for delivering that information because it provides immediate, shared and completely transparent information stored on an immutable ledger that can be accessed only by permissioned network members. A blockchain network can track orders, payments, accounts, production and much more.

About the College

As an Institute committed in quality education, MST aims at providing learning with a Technology- edge. It endeavors to provide constant training to its students to help them evolve as competent professionals in the highly competitive world. Right from its inception in 2001, it has been working hard to meet this objective. A new civilization is emerging on our horizon. This civilization brings with it a new way of working. Millions are already using their lives to the rhythms of tomorrow.

About CSE & IT Dept.

The Department of CSE & IT quenches the thirst of knowledge of students efficiently with the highest level of competency required by the industry. With its experienced faculty members having excellent academic backgrounds, it runs various applications courses through various computer aided demonstrations making their learning a rich and rewarding experience.

About the Workshop

Block chain is a system of recording information in a way that makes it difficult or impossible to tamper with, hack, or cheat the system. A block chain is usually a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the block chain.

Each block in the chain contains a number of transactions, and every time a new transaction occurs on the block chain, a record of the transaction is added to every participant's ledger.
