SUMMARY REPORT OF Autocad

AutoCAD is a computer-aided drafting/design (CAD) software application. This software was developed by Autodesk. AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. The AutoCAD most commercial CAD programs ran on mainframe computer or minicomputer. Since 2010 AutoCAD was released as a mobile and web app as well marketed as AutoCAD by this we can make drawing easier. This will save time.

AutoCAD software automatically redraws the geometry to illustrate the dash and hidden lines of part which are blocked by the other parts in mechanical design. It enables you to produce very accurate design and drawing can be creating 2D or 3D rotate.

SUMMARY REPORT OF MATCAD Programming

Mathcad is a product of MathSoft inc. The Mathcad can help us **to calculate, graph, and communicate technical ideas**. It lets us work with mathematical expressions using standard math notation - but with the added ability to recalculate, view, present, and publish with ease, even to the Web.

AbouttheCollege:

MahaveerInstituteofScience&Technology(MIST) established in the year 2001 by MahaveerEducationalSociety.MISToffering8UGprograms.

AbouttheDepartment:

The Department of Electrical &Electronics Engineering was established in 2001 which offers B.Tech. and M.Tech (POWER Engineering and Energy Systems) courses with highly qualified dedicated and motivated faculty. The courses and programmes offered by the department not only impart technical expertise to the students but also gives a professional experience.

.Topics to be covered:

- Introduction
- raman analysis
- model equation
- Dafalias Model
- Manzari Model
- Equivalent Impedance and Conductance
- Transfer Function Models

AbouttheFDP:

Mathcad is a product of MathSoft inc. The Mathc can help us to calculate, graph, and communicate technical ideas. It lets us work with mathematical expressions using standard math notation - but w the added ability to recalculate, view, present, an publish with ease, even to the Web.

Auto CAD SYLLABUS

1: Getting Started with AutoCAD

- Opening and Creating Drawings
- Exploring the AutoCAD interface
- Zooming and Panning

2: Basic Drawing & Editing Commands

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

8: Advanced Object Types

- Polylines
- Arcs

PRINCIPAL
MAHAVEER
INSTITUTE OF SCIENCE & TECHNOLOGY
Bandlaguda, Hyd-500 005.

- Polygons
- Ellipses

9: Advanced Editing Commands

- Trim and Extend
- Fillet and Chamfer
- Polyline Edit and Spline
- Offset and Explode
- Join

10: Inserting Blocks

- The Insert Block Command
- Inserting Blocks with Tool Palettes
- Dynamic Blocs
- Migrating Blocks and other Elements between Drawings with Design Center

11: Text

- The Multiline Text Tool
- The Single Line Text Tool
- Editing Text
- Text in Model Space vs. Paper Space
- The Multileader Tool

12: Hatching

- The Hatch Command
- The Hatch Editor Ribbon Tab
- Saving and Applying Hatches with Tool Palettes

13: Adding Dimensions

- Using Dimensioning Tools
- Dimensioning in a Layout Tab vs. the Model Tab
- Using Dimension Styles
- Editing Dimensions

14.Projects - Annotating Your Drawing

- Dimensioning a Mechanical Drawing

CATIA COURSE
Summery

- In this course, you will learn how to utilize the core functionality enhancements in Catia.
- First, you will become familiar with using and customizing the new ribbon interface in Catia.
- The new measure and sectioning interfaces will also be examined. Next, you will become familiar with the Sketcherworkflow and reference enhancements.
- Part modeling enhancements to features such as Extrude, Corner Chamfer, Sweeps, Blends, and Datum Curves will then beexamined.
- You will also learn about new and enhanced Assembly capabilities, such as selecting multiple components, the newrelationship constraints, and enhancements for dragging components.
- Then, you will examine the new Table and Balloon functionality for 2-D drawings, and review various detailingenhancements.
- At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At theend of the course, you will complete a course assessment in Catia intended to evaluate your understanding of the course as a whole.

Technical Training Exam on ANSYS Software
(A.Y-2020-21)

2x10=20 Marks

Answer All the Questions

1.

Given the 2D truss structure represented in Figure 1.1, where:

- h= 5 m
- L= 5 m
- F=1000 N
- E=1.0x10^6 N/m^2 (Young's modulus)
- A=0.1 m^2 (Cross-section area of each beam element)

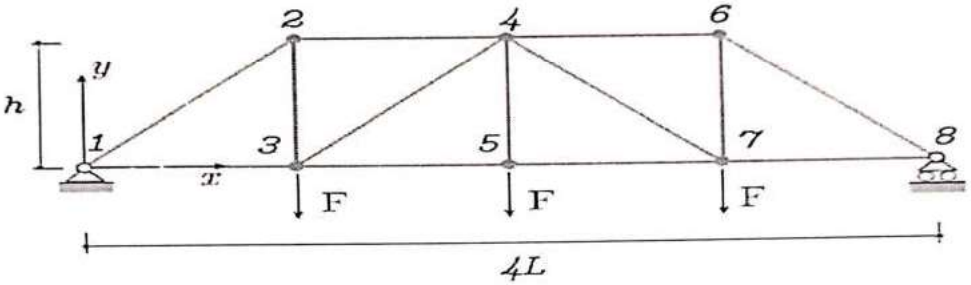

Figure 1.1: Example truss structure, constraints and loads.

2.

7.13 Determine the stresses in the plate with the hole subjected to the tensile stress shown in Figure P7–13. Graph the stress variation σ_x versus the distance y from the hole. Let $E = 200$ GPa, $\nu = 0.25$, and $r = 25$ mm. (Use various mesh densities, depending on your computer program in your finite element model.) Use symmetry as appropriate.

ANSYS COURSE
Summery

Department of Mechanical Engineering

1.The Geometry preparation training course is for users who want to create and modify geometry in preparation for CFD or FEA analysis. The training will be focused in either ANSYS Design Modeler or ANSYS Space Claim.

2. The ANSYS Meshing training course will give you the tools for generating good quality meshes for Fluent andCFX. The trainee will choose which tool should be used: ANSYS Meshing, Fluent Meshing or ICEM CFD

3. This course will show how to set up a range of simulation types in the ANSYS Fluent or ANSYS CFX solver, aswell as how to post process the results by using our CFD Post Tool.

4. This course will show how to set up a range of simulation types in ANSYS Mechanical, as well as how to post process and evaluate your results.

5. To acquire advance knowledge to perform explicit simulations with ANSYS Explicit STR, ANSYS AUTODYN or ANSYS LS-DYNA

6. This is an introductory to intermediate level training for using ANSYS HFSS for all applications, like RF/microwave, antennas or planar problems. Participants will get understanding of HFSS modeling, solution process and post-processing features, which can be used for other advanced applications. The course will also cover advanced topics like dynamic link between EM and circuit, impedance matching, overview of HFSS 3Dlayout interface and speeding-up HFSS simulation using HPC.

7. Provide the needed tools for the complete simulation of a pressure Vessel from scratch. Several types of analysis and boundary conditions will be discussed. by using pressure vessels examples.

8.To acquire advance knowledge for performing mechanical simulation in Fixed Offshore Structures.

Technical Training Exam on 3D-Printing
(A.Y-2020-21)

Department of Mechanical Engineering

2x10=20 Marks

Answer All the Questions

Answer All the Questions 5x4=20 Marks

1. Compare the Third Industrial Revolution to the First Industrial Revolution. What are the differences and similarities?
2. Explain what design freedom means and how 3D printing contributes to it. Which technology would provide the best basis for food printing? Why?
3. Explain the following: "A mesh can never be smooth."
a) Describe the relationship between resolution and mesh smoothness.
b)Describe the relationship between mesh smoothness and file size.
c)What can be learned by studying the designs of others?
4. Describe the advantages of designing an object using 3D software instead of 2D software.
a) Describe the advantages of 2D software over hand sketches.
b)Explain the role of CAM software in the printing process. Why is it needed?
5. Describe the unique considerations involved when designing a gear system for 3D printing.

3D-PRINTING COURSE
Summery

Department of Mechanical Engineering

1.3D Printing uses software that slices the 3D model into layers (0.01mm thick or less in most cases). Each layer is then traced onto the build plate by the printer, once the pattern is completed, the build plate is lowered and the next layer is added on top of the previous one.

2.Layer by layer production allows for much greater flexibility and creativity in the design process. No longer do designers have to design for manufacture, but instead they can create a part that is lighter and stronger by means of better design. Parts can be completely re-designed so that they are stronger in the areas that they need to be and lighter overall.

3.3D Printing significantly speeds up the design and prototyping process. There is no problem with creating one part at a time, and changing the design each time it is produced. Parts can be created within hours. Bringing the design cycle down to a matter of days or weeks compared to months. Also, since the price of 3D printers has decreased over the years, some 3D printers are now within financial reach of the ordinary consumer or small company.

4.Typical manufacturing techniques are known as 'Subtractive Manufacturing' because the process is one of removing material from a preformed block. Processes such as Milling and Cutting are subtractive manufacturing techniques. This type of process creates a lot of waste since: the material that is cut off generally cannot be used for anything else andis simply sent out as scrap.

Dear Sir,

As you may be aware, we, MIST, are part of the reputed **MAHAVEER** group of educational institutions and have been in the service of imparting quality education to the society since 2001 i.e. last **19** years.

As part of our overall efforts to improve the outlook of students, we regularly invite scientists, engineers, technocrats, academicians and entrepreneurs of repute to visit our institute and share the latest technical developments and valuable learning's from their professional life with our students. As a part of this 'Invited Technical Lecture' series, many individuals of repute have already delivered lectures at our institute for the benefit of our students and faculty.

As you is a well-known expert with deep domain knowledge in the area of **DESIGN OF ELETRONICS DEVICES.** It would be a great pleasure to us in inviting you for delivering yours expert guest lecturers to our students for the subject "**ROLE OF ADVANCED ELECTRONIC MATERIALS AND DEVICES IN SPACE AND DEFENCE APPLICATIONS**" approximately two hours duration in a day in every week during Ist Semester.

We are thankful for accepting our request.

The following is the schedule of expert lectures on the subject:-
Every Saturday 3rd & 4th periods, except 2nd Saturday of month.

Thanking you,

Yours sincerely

HOD, ECE Department,

SUMMARY REPORT OF PYTHON PROGRAMMING

- Python programming language is considered as simple language as it extracts most of the concepts of C and Java in terms of syntax.
- Python programming is used to learn how to design, program the python applications and explains how to use lists, tuples and dictionaries in python programs
- It explains how to identify python objet types to use indexing and slicing to access data and also to define the structure and components of a python program
- It contains the concepts of loops and decision control statements and a parameter passing techniques
- It explains the concepts of packages and to read write into the python file, has beautiful concepts of inheriting a class and ability to handle the exceptions

CIRCULAR

Technical Trainings for III & IV B. Tech students are starting from **07-06-2020** onwards. All HODs and placements coordinators have to manage the trainings and ensure 95% attendance all through the sessions.

All mentors need to send the compiled feedback report to HOD at e3hod.cse@gmail.com daily. Mentors are advised to take care of PNR (Students not participating in training).

Agenda: **3D Graphics**

SUMMARY REPORT OF PYTHON PROGRAMMING

- Python programming language is considered as simple language as it extracts most of the concepts of C and Java in terms of syntax.
- Python programming is used to learn how to design, program the python applications and explains how to use lists, tuples and dictionaries in python programs
- It explains how to identify python objet types to use indexing and slicing to access data and also to define the structure and components of a python program
- It contains the concepts of loops and decision control statements and a parameter passing techniques
- It explains the concepts of packages and to read write into the python file, has beautiful concepts of inheriting a class and ability to handle the exceptions

About the College

As an Institute committed in quality education, MIST aims at providing learning with a Technology-edge. It endeavors to provide consistent training to its students to help them evolve as competent professionals in the highly competitive world. Right from its inception in 2001, it has been tuning itself to meet this objective. A new civilization is emerging ion our lives . This civilization brings with it a new way of working. Millions are already tuning their lives to the rhythms of tomorrow.

About IT Dept.

The Department of IT was established in the year 2005 and quenches the thirst of knowledge of students effectively which meets the highest level of competency required by the industry. With its experienced faculty members having excellent academic backgrounds, its trains students supplementing classroom lectures with computer aided demonstrations making their learning a rich a rewarding experience.

About the Course

Python is an extensive programming language that is majorly used for Rapid Application Development (RAD), prototyping, data analysis, artificial intelligence and scientific computing. It is one of the most simple and straightforward programming languages to learn with an easy syntax. Digital Nest , a Python training institute in Hyderabad , has curated the best industry-oriented python training course structure, involving practical learning and implementation methodology. The python course trainers hail from top MNCs with immense knowledge, command over the programming language and hold years of experience in real time.

Course : Micro Category Multi rotor Drone Pilot Course

Report summary

A multirotor or multicopter is a rotorcraft with more than two lift-generating rotors. An advantage of multirotor aircraft is the simpler rotor mechanics required for flight control. Unlike single- and double-rotor helicopters which use complex variable pitch rotors whose pitch varies as the blade rotates for flight stability and control, multirotors often use fixed-pitch blades; control of vehicle motion is achieved by varying the relative speed of each rotor to change the thrust and torque produced by each.

There are four main physical types of professional drones: multi-rotor, fixed-wing, single-rotor helicopter, and fixed-wing hybrid VTOL. The different body styles of each type of drone contribute to the amount of weight they can carry (payload), efficiency and duration of the flight.

SUMMARY REPORT ON ADD ON COURSE(ULTRASONICS)

ultrasonics, Vibrational or stress waves in elastic media that have a frequency above 20 kilohertz, the highest frequency of sound waves that can be detected by the human ear. They can be generated or detected by piezoelectric transducers (*see* piezoelectricity). High-power ultrasonics produce distortion in a medium; applications include ultrasonic welding, drilling, irradiation of fluid suspensions (as in wine clarification), cleaning of surfaces (such as jewelry), and disruption of biological structures. Low-power ultrasonic waves do not cause distortions; uses include sonar, structure testing, and medical imaging and diagnosis. Some animals, including bats, employ ultrasonic echolocation for navigation.

ETABS SYLLABUS

1· The knowledge about specialized software such as ETABS, SAFE to model and analyze for buildings.

2: Be able to model, analyze, and solve structural models on Specialized software and access analysis results such as force, Displacement and another parameter for structural design.

3: Be able to communicate and work in the group flexibly and Efficiently.

4: Explaining concepts, terminology and rules used in ETABS, SAFE software.

5: Modeling and analyzing type of simple and complex structural Systems.

6: Analyzing and determining the values of internal forces, Displacements and other parameters for structural design.

7: Working in the group to solve the problems relates to using Software ETABS, SAFE.

8: Choosing appreciable communication skills such as speech, Text, images, graphics, when expressing personal views.

Revit COURSE
Summery

Department of Civil Engineering

- Use Revit for daily working process.
- Navigate throughout Revit using major navigating tools.
- Understand the concept and techniques to draw.
- Create multiple designs using several of tools.
- Create layers to control the objects' visibility.
- Explain drawing using annotations.
- Plot or print the drawing by scale.
- To use constraint for certain design.

DEPARTMENT OF ELECTRICAL & ELECTRONICS

SUMMARY REPORT OF MATLAB PROGRAMMING

This course site is the result of several iterations of an introductory course I have given at MIT, the last of which was called DR. MATLAB. In that course I strived to change the usual pattern of teaching/learning MATLAB from a programming view point to a mathematical one. The idea is that by thinking about mathematical problems, students are prodded into learning MATLAB for the purpose of solving the problem at hand. The down-side to this approach is that it is somewhat based on the idea that people are already excited about mathematics, or can be excited about it. That said, as I taught the course at MIT, it was not a big problem.

Variables, arrays, conditional statements, loops, functions, and plots are covered in a project-based style where much of the learning happens away from the classroom. Students are expected to spend about 4 hours per week on homework. At the end of the course, students should be able to use MATLAB in their own work, and be prepared to deepen their MATLAB programming skills and tackle other languages for computing, such as Java, C++, or Python.

Duration: 120 Minutes **4 X 5 = 20 Marks**

Answer the following all questions. Each question carries 5 marks.

1. How can fix the floating node error in pspice?
2. How to simulate a three phase voltage source in orcad capture?
3. What is the purpose to simulate the FPAA mapping of analog circuit?
4. How do to get gain loop of a flyback converter for compensation?

SUMMARY REPORT OF PSPICE programming Certification

PSPICE is a circuit analysis tool that allows the user to simulate a circuit and extract key voltages and currents. Information is entered into PSPICE via one of two methods; they are a typed 'Net List' or by designing a visual a schematic which is transformed into a netlist. In this class we will look at both the net list and the schematics. However, to to fully utilize the schematics we must first understand and become familiar with designing the net list.

About the College:
An Institute committed to quality education **MIST** aims at providing learning with a technology edge. Right from its inception in **2001**, it has turning itself to meet this objective. It endeavors to provide consistent training to the students to help them evolve as competent professionals in the highly competitive world.

About the Department:
The Department of E.E.E is working with a mission to contribute through excellence in technical education, with research orientation. It imparts ethical & moral values to the student's so as to make them emerge as responsible professionals. With its experienced faculty members having excellent academic backgrounds, it trains students supplementing classroom lectures with computer aided demonstrations making their learning a rich and rewarding experience

Auto CAD SYLLABUS

1: Getting Started with AutoCAD

- Opening and Creating Drawings
- Exploring the AutoCAD interface
- Zooming and Panning

2: Basic Drawing & Editing Commands

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

8: Advanced Object Types

- Polylines
- Arcs

- Polygons
- Ellipses

9: Advanced Editing Commands

- Trim and Extend
- Fillet and Chamfer
- Polyline Edit and Spline
- Offset and Explode
- Join

10: Inserting Blocks

- The Insert Block Command
- Inserting Blocks with Tool Palettes
- Dynamic Blocs
- Migrating Blocks and other Elements between Drawings with Design Center

11: Text

- The Multiline Text Tool
- The Single Line Text Tool
- Editing Text
- Text in Model Space vs. Paper Space
- The Multileader Tool

12: Hatching

- The Hatch Command
- The Hatch Editor Ribbon Tab
- Saving and Applying Hatches with Tool Palettes

13: Adding Dimensions

- Using Dimensioning Tools
- Dimensioning in a Layout Tab vs. the Model Tab
- Using Dimension Styles
- Editing Dimensions

14.Projects - Annotating Your Drawing

- Dimensioning a Mechanical Drawing

CATIA COURSE
Summery

- In this course, you will learn how to utilize the core functionality enhancements in Catia.
- First, you will become familiar with using and customizing the new ribbon interface in Catia.
- The new measure and sectioning interfaces will also be examined. Next, you will become familiar with the Sketcherworkflow and reference enhancements.
- Part modeling enhancements to features such as Extrude, Corner Chamfer, Sweeps, Blends, and Datum Curves will then beexamined.
- You will also learn about new and enhanced Assembly capabilities, such as selecting multiple components, the newrelationship constraints, and enhancements for dragging components.
- Then, you will examine the new Table and Balloon functionality for 2-D drawings, and review various detailingenhancements.
- At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At theend of the course, you will complete a course assessment in Catia intended to evaluate your understanding of the course as a whole.

Technical Training Exam on ANSYS Software
(A.Y-2019-2020)

2x10=20 Marks

Answer All the Questions

1.

Given the 2D truss structure represented in Figure 1.1, where:

- h= 5 m
- L= 5 m
- F=1000 N
- E=1.0x10^6 N/m^2 (Young's modulus)
- A=0.1 m^2 (Cross-section area of each beam element)

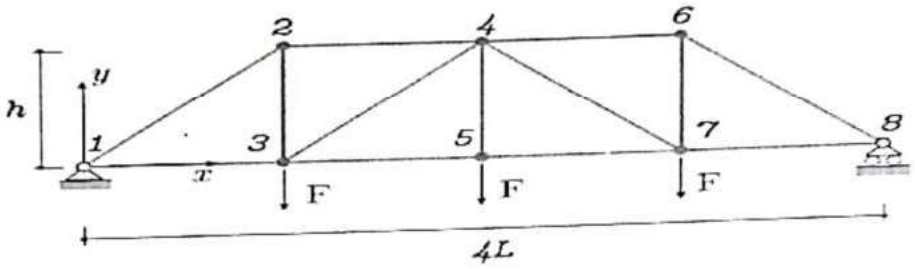

Figure 1.1: Example truss structure, constraints and loads.

2.

7.13 **Determine the stresses in the plate with the hole subjected to the tensile stress shown in Figure P7–13. Graph the stress variation σ_x versus the distance y from the hole. Let $E = 200$ GPa, $\nu = 0.25$, and $r = 25$ mm. (Use various mesh densities, depending on your computer program in your finite element model.) Use symmetry as appropriate.**

ANSYS COURSE
Summery

Department of Mechanical Engineering

1.The Geometry preparation training course is for users who want to create and modify geometry in preparation for CFD or FEA analysis. The training will be focused in either ANSYS Design Modeler or ANSYS Space Claim.

2. The ANSYS Meshing training course will give you the tools for generating good quality meshes for Fluent andCFX. The trainee will choose which tool should be used: ANSYS Meshing, Fluent Meshing or ICEM CFD

3. This course will show how to set up a range of simulation types in the ANSYS Fluent or ANSYS CFX solver, aswell as how to post process the results by using our CFD Post Tool.

4. This course will show how to set up a range of simulation types in ANSYS Mechanical, as well as how to post process and evaluate your results.

5. To acquire advance knowledge to perform explicit simulations with ANSYS Explicit STR, ANSYS AUTODYN or ANSYS LS-DYNA

6. This is an introductory to intermediate level training for using ANSYS HFSS for all applications, like RF/microwave, antennas or planar problems. Participants will get understanding of HFSS modeling, solution process and post-processing features, which can be used for other advanced applications. The course will also cover advanced topics like dynamic link between EM and circuit, impedance matching, overview of HFSS 3Dlayout interface and speeding-up HFSS simulation using HPC.

7. Provide the needed tools for the complete simulation of a pressure Vessel from scratch. Several types of analysis and boundary conditions will be discussed, by using pressure vessels examples.

8.To acquire advance knowledge for performing mechanical simulation in Fixed Offshore Structures.

Dear Sir,

As you may be aware, we, MIST, are part of the reputed **MAHAVEER** group of educational institutions and have been in the service of imparting quality education to the society since 2001 i.e. last **18** years.

As part of our overall efforts to improve the outlook of students, we regularly invite scientists, engineers, technocrats, academicians and entrepreneurs of repute to visit our institute and share the latest technical developments and valuable learning's from their professional life with our students. As a part of this 'Invited Technical Lecture' series, many individuals of repute have already delivered lectures at our institute for the benefit of our students and faculty.

As you is a well-known expert with deep domain knowledge in the area of **DESIGN OF ELETRONICS DEVICES.** It would be a great pleasure to us in inviting you for delivering yours expert guest lecturers to our students for the subject "**ROLE OF ADVANCED ELECTRONIC MATERIALS AND DEVICES IN SPACE AND DEFENCE APPLICATIONS**" approximately two hours duration in a day in every week during I[st] Semester.

We are thankful for accepting our request.

The following is the schedule of expert lectures on the subject:-
Every Saturday 3rd & 4[th] periods, except 2[nd] Saturday of month.

Thanking you,

Yours sincerely

HOD, ECE Department,

QUESTION PAPER

ROLE OF ADVANCED ELECTRONIC MATERIALS & DEVICES IN SPACE & DEFENCE APPLICATIONS:

Duration:120 Minutes **5 X 6 = 30Marks**

Answer the following all questions. Each question carries 6 marks.

1 Explain the operation of BJT as an Amplifier in CE Configuration.

2 Input and Output Characteristics In CE And CB Configurations

3. Self Bias Circuit Operation why it is Better Compared To All explain it .

4. Write about Compensation techniques

5. Compare the CB, CE, CC Configurations

Dear Sir,

As you may be aware, we, MIST, are part of the reputed **MAHAVEER** group of educational institutions and have been in the service of imparting quality education to the society since 2001 i.e. last **18** years.

As part of our overall efforts to improve the outlook of students, we regularly invite scientists, engineers, technocrats, academicians and entrepreneurs of repute to visit our institute and share the latest technical developments and valuable learning's from their professional life with our students. As a part of this 'Invited Technical Lecture' series, many individuals of repute have already delivered lectures at our institute for the benefit of our students and faculty.

As you is a well-known expert with deep domain knowledge in the area of **DESIGN OF ELETRONICS DEVICES.** It would be a great pleasure to us in inviting you for delivering yours expert guest lecturers to our students for the subject **"Advanced VLSI Technology"** approximately two hours duration in a day in every week during II[nd] Semester.

We are thankful for accepting our request.

The following is the schedule of expert lectures on the subject:-
Every Saturday 3rd & 4[th] periods. except 2[nd] Saturday of month.

Thanking you,

Yours sincerely,

HOD, ECE Department.

SYLLABUS: ADVACED VLSI DESIGN

- Digital Integrated Circuit Design
  - CMOS standard cell characteristics
  - Delay calculation (Elmore model, Logical Effort)
  - Low power design
  - Static Timing Analysis
  - Digital ASIC design flow
- Analog Integrated Circuit Design
  - Device Physics of the MOSFET
  - Physics Insights: MOSFET as a Switch
  - Analytical Techniques: Low and High frequency analysis, Noise analysis
  - Feedback
  - OPAMP Design
  - Oscillators and Phase Locked Loops
  - Analog Integrated Circuits Beyond Silicon
- Emerging Technologies
  - Open Source Processor Architecture (RISC-V)
  - Neuromorphic Computing
  - Edge Computing
  - Flexible Electronics
- Advanced Digital Design and FPGA based Design
  - VLSI Micro-architecture Design
  - Timing Closure
  - High Throughput Computing
  - FPGA Based System Design
  - Processor Design

SUMMARY REPORT OF Basic Web Designing

- Layout. If you want to design and build websites, understanding good layout is key. We suggest keeping things minimal.
- Color. You have the colors of the rainbow and beyond available to you. ... The power of the color picker can be wielded.
- Typography. Webflow comes with a wide selection of fonts and the option to add more. Typography is two-dimensional.

SUMMARY REPORT OF Android Application Development

Android apps have transformed the mobile app market.
There is a broad range of applications of Android app, particularly in the business world.
When it comes to the development of Android app, certain things need to be deemed.
The expectations of the customers, demands of the business, the workflow of the business, the requirements of the employees and group members, etc. need to be think about before app development.
Best Android apps can simply be created with diverse app-creation platforms or through traditional app development. Android app development can assist a business in reaching out to more customers, improve its sales, improve its brand image and create a loyal customer base.
It can lay the base for the success of any business.

About the College

As an institute committed in quality education, MIST aims at providing learning with a Technology edge. It endeavors to provide consistent training to its students to help them evolve as competent professionals in the highly competitive world. Right from its inception in 2001, it has been tuning itself to meet this objective. A new civilization is emerging lon our lives . This civilization brings with it a new way of working. Millions are already tuning their lives to the rhythms of tomorrow.

About IT Dept

The Department of IT quenches the thirst of knowledge of students effectively which meets the highest level of competency required by the industry. With its experienced faculty members having excellent academic backgrounds, it trains students supplementing classroom lectures with computer aided demonstrations making their learning a rich hands-on-ing experience.

About the Course

This course will teach you the most [illegible] implementation of concepts. In this course, you will learn about Android, which also includes how to download the software and how to install a look-alike phone that emulator where-in you will run your application. Again, this course contains two simple applications based on the things you learned in this course.

SUMMARY REPORT OF Oracle Java Certification

Oracle is a database that delivers excellent performance when challenged with demanding tasks.

The ACID test, which is an **important** tool used to ensure the integrity of data stored, was easily passed by **Oracle** databases.

This test is **important** since reliable data storage is the main purpose of a database.

Java is one of the most popular programming languages used to create Web applications and platforms.

It was designed for flexibility, allowing developers to write code that would run on any machine, regardless of architecture or platform.

SYLLABUS

Course: Computer Aided Analysis FLUENT

1 : Introduction

- What is CFD?
- Applications of CFD & Uses of CFD
- The Mathematics of CFD
- Fundamentals of Fluid Mechanics
- EQUATION OF STATE CFD Methodology
- Introduction to ANSYS Fluent

2: Graphical interface

- Menu Bar & Toolbars
- The Navigation Pane
- Task Pages
- The Console
- Boundary Conditions
- Fluent in Workbench

3: Solid Modeling Fundamentals

- Creating a Fluent Fluid Flow Analysis System in ANSYS Workbench
- Creating the Geometry in ANSYS DesignModeler
- Meshing the Geometry in the ANSYS Meshing Application
- Setting Up the CFD Simulation in ANSYS Fluent
- Displaying Results in ANSYS Fluent and CFD-Post

4: Turbulence Model in Fluent

- Preliminary Analysis
- Geometry Mesh
- Mesh Refinement
- Physics Setup
- Numerical Solution

Summary report

ANSYS Fluent is a powerful computational fluid dynamics (CFD) software for optimizing product's performance. Its broad physical modeling capabilities help model flow, turbulence, and heat transfer. With ANSYS Fluent you have access to several fluid flow physics model, which help analyze your product with precision

Ansys FLUENT software contains the broad physical modeling capabilities needed to model flow, turbulence, heat transfer, and reactions for industrial applications ranging from air flow over an aircraft wing to combustion in a furnace, from bubble columns to oil platforms, from blood flow to semiconductor manufacturing

SUMMARY REPORT OF SOFTSKILLS

Soft skills, also known as common skills or core skills, are skills which are desirable in all professions.These include critical thinking, problem solving, public speaking, professional writing, teamwork, digital literacy, leadership, professional attitude, work ethic, career management and intercultural fluency. This is in contrast to hard skills, which are specific to individual professions.The word "skill" highlights the practical function. The term alone has a broad meaning, and describes a particular ability to complete tasks ranging from easier ones like "learning how to kick a ball" to harder ones like "learning how to be creative".In this specific instance, the word "skill" has to be interpreted as the ability to master hardly controlled actions.

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

About the college:

As an Institute committed to quality education, MIST aims at providing learning with a Technology-edge. It endeavors to provide consistent training to its students to help them evolve as competent professionals in the highly competitive world. Right from its inception in 2001, it has been tuning itself to meet this objective. A new civilization is emerging in our lives. This new civilization brings with it a new way of working. Millions are already tuning their lives to the rhythms of tomorrow.

About EEE Department:

The Department of E.E.E is working with a mission to contribute through excellence in technical education, with research orientation. It imparts ethical & moral values to the student's so as to make them emerge as responsible professionals. With its experienced faculty members having excellent academic backgrounds, it trains students supplementing classroom lectures with computer aided demonstrations making their learning a rich and rewarding experience

- Opening and Creating Drawings
- Exploring the AutoCAD interface
- Zooming and Panning

2: Basic Drawing & Editing Commands

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

8: Advanced Object Types

- Polylines
- Arcs

INSTITUTE
Bandlaguda

- Polygons
- Ellipses

9: Advanced Editing Commands

- Trim and Extend
- Fillet and Chamfer
- Polyline Edit and Spline
- Offset and Explode
- Join

10: Inserting Blocks

- The Insert Block Command
- Inserting Blocks with Tool Palettes
- Dynamic Blocs
- Migrating Blocks and other Elements between Drawings with Design Center

Sir,
Sub: Reques,L.t for approval to include ADD -ON subject in regular curriculum of B.Tech, ECE
Resource Person: Dr V. N Mani, Scientist F
C-MET, Govt. of India
Hyderabad -500051

In order to increase employability and entrepreneurship for students pursuing B.TECH , departmen ECE is planning to organize **Advance VLSI TECHNOLOGY** as add- on course in regi curriculum for 4th year Btech, II SEMESTER, AY 2018-19 apart from regular syllabus as per JNTUH.

Thanking You

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

SYLLABUS : ADVACED VLSI DESIGN

- Digital Integrated Circuit Design
  - CMOS standard cell characteristics
  - Delay calculation (Elmore model, Logical Effort)
  - Low power design
  - Static Timing Analysis
  - Digital ASIC design flow
- Analog Integrated Circuit Design
  - Device Physics of the MOSFET
  - Physics Insights: MOSFET as a Switch
  - Analytical Techniques: Low and High frequency analysis, Noise analysis
  - Feedback
  - OPAMP Design
  - Oscillators and Phase Locked Loops
  - Analog Integrated Circuits Beyond Silicon
- Emerging Technologies
  - Open Source Processor Architecture (RISC-V)
  - Neuromorphic Computing
  - Edge Computing
  - Flexible Electronics
- Advanced Digital Design and FPGA based Design
  - VLSI Micro-architecture Design
  - Timing Closure
  - High Throughput Computing
  - FPGA Based System Design
  - Processor Design

Duration : 20 to 25 hrs /semester

Dear Sir.

As you may be aware, we, MIST, are part of the reputed **MAHAVEER** group of educational institutions and have been in the service of imparting quality education to the society since 2001 i.e. last 17 years.

As part of our overall efforts to improve the outlook of students, we regularly invite scientists, engineers, technocrats, academicians and entrepreneurs of repute to visit our institute and share the latest technical developments and valuable learning's from their professional life with our students. As a part of this 'Invited Technical Lecture' series, many individuals of repute have already delivered lectures at our institute for the benefit of our students and faculty.

As you is a well-known expert with deep domain knowledge in the area of **DESIGN OF ELETRONICS DEVICES.** It would be a great pleasure to us in inviting you for delivering yours expert guest lecturers to our students for the subject **"Advanced VLSI Technology"** approximately two hours duration in a day in every week during II[nd] Semester.

We are thankful for accepting our request.

The following is the schedule of expert lectures on the subject:-
Every Saturday 3rd & 4[th] periods, except 2[nd] Saturday of month.

Thanking you,

Yours sincerely

QUESTION PAPER

ADVANCED VLSI DESIGN

Duration:120Minutes **4 X 7.5= 30Marks**

Answer the following all questions. Each question carries 7.5 marks.

1.Explain with neat diagram the architecture of FPGA.

2.Explain about wiring capacitance, fan in, fan out, choice of layers.

3.Discuss the advantages of SRAM over DRAM.

4.Compare CPLD and FPGA in all respects.

SUMMAKY REPORT OF Web application development using PHP & XML

PHP Programming the Languages mostly commonly used for Website and Web Application Development.

PHP is a general purpose, server-side scripting language run a web server that's designed to make dynamic pages and applications.

PHP as a web development option is secure, fast and a reliable that offers lots more advantages to make it accessible to a lot of people.

It is to be given a thought as to what has made PHP Programming as one of the most commonly programming language for the Web industry.

XML allows the flexible development of user-defined document types.

It provides a robust, non-proprietary, persistent, and verifiable file format for the storage and transmission of text and data both on and off the Web; and it removes the more complex options of SGML, making it easier to program for.

Course:Computer Aided Design CREO

Summary report

This course aims to help product designers and engineers in developing a product design virtually. Creo is equipped with all the capabilities that are required for completing a product design. The software Creo provides the broadest range of scalable software solutions towards product development within the market.

With Creo Parametric, and its extensions, you can create, analyze, view, and share designs downstream using 2D CAD, 3D CAD, and parametric and direct modeling capabilities

CATIA COURSE

Summery

- In this course, you will learn how to utilize the core functionality enhancements in Catia.
- First, you will become familiar with using and customizing the new ribbon interface in Catia.
- The new measure and sectioning interfaces will also be examined. Next, you will become familiar with the Sketcher workflow and reference enhancements.
- Part modeling enhancements to features such as Extrude, Corner Chamfer, Sweeps, Blends, and Datum Curves will then be examined.
- You will also learn about new and enhanced Assembly capabilities, such as selecting multiple components, the new relationship constraints, and enhancements for dragging components.
- Then, you will examine the new Table and Balloon functionality for 2-D drawings, and review various detailing enhancements.
- At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Catia intended to evaluate your understanding of the course as a whole.

Dear Sir,

As you may be aware, we, MIST, are part of the reputed **MAHAVEER** group of educational institutions and have been in the service of imparting quality education to the society since 2001 i.e. last **17** years.

As part of our overall efforts to improve the outlook of students, we regularly invite scientists, engineers, technocrats, academicians and entrepreneurs of repute to visit our institute and share the latest technical developments and valuable learning's from their professional life with our students. As a part of this 'Invited Technical Lecture' series, many individuals of repute have already delivered lectures at our institute for the benefit of our students and faculty.

As you is a well-known expert with deep domain knowledge in the area of **DESIGN OF ELETRONICS DEVICES.** It would be a great pleasure to us in inviting you for delivering yours expert guest lecturers to our students for the subject **"ROLE OF ADVANCED ELECTRONIC MATERIALS AND DEVICES IN SPACE AND DEFENCE APPLICATIONS"** approximately two hours duration in a day in every week during I[st] Semester.

We are thankful for accepting our request.

The following is the schedule of expert lectures on the subject:-
Every Saturday 3rd & 4[th] periods, except 2[nd] Saturday of month.

Thanking you,

Yours sincerely

Accepted your invitation

GEO5 COURSE
Summery

Department of Civil Engineering

- Use GEO5 for daily working process.
- Navigate throughout GEO5 using major navigating tools.
- Understand the concept and techniques to draw.
- Create multiple designs using several of tools.
- Create layers to control the objects' visibility.
- Explain drawing using annotations.
- Plot or print the drawing by scale.
- To use constraint for certain design.

Technical Training Exam on ANSYS Software
(A.Y-2018-2019)

2x10=20 Marks

Answer All the Questions

1.

Given the 2D truss structure represented in Figure 1.1, where:

- h= 5 m
- L= 5 m
- F=1000 N
- E=1.0x10^6 N/m^2 (Young's modulus)
- A=0.1 m^2 (Cross-section area of each beam element)

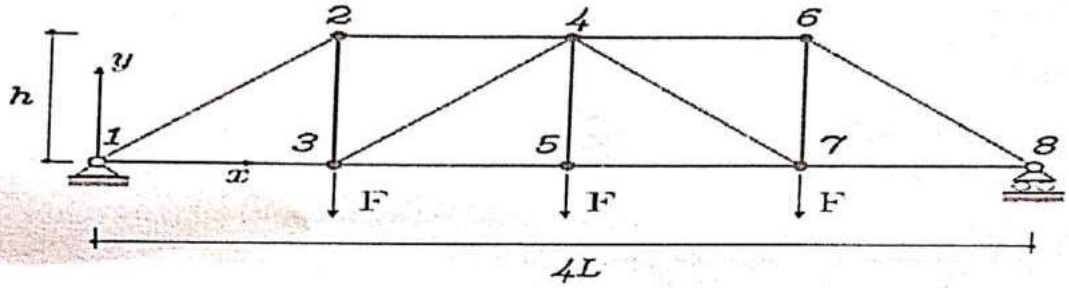

Figure 1.1: Example truss structure, constraints and loads.

2.

7.13 **Determine the stresses in the plate with the hole subjected to the tensile stress shown in Figure P7–13. Graph the stress variation σ_x versus the distance y from the hole. Let $E = 200$ GPa, $\nu = 0.25$, and $t = 25$ mm. (Use various mesh densities, depending on your computer program in your finite element model.) Use symmetry as appropriate.**

ANSYS COURSE

Summery

Department of Mechanical Engineering

1.The Geometry preparation training course is for users who want to create and modify geometry in preparation for CFD or FEA analysis. The training will be focused in either ANSYS Design Modeler or ANSYS Space Claim.

2. The ANSYS Meshing training course will give you the tools for generating good quality meshes for Fluent andCFX. The trainee will choose which tool should be used: ANSYS Meshing, Fluent Meshing or ICEM CFD

3. This course will show how to set up a range of simulation types in the ANSYS Fluent or ANSYS CFX solver, aswell as how to post process the results by using our CFD Post Tool.

4. This course will show how to set up a range of simulation types in ANSYS Mechanical, as well as how to post process and evaluate your results.

5. To acquire advance knowledge to perform explicit simulations with ANSYS Explicit STR, ANSYS AUTODYN or ANSYS LS-DYNA

6. This is an introductory to intermediate level training for using ANSYS HFSS for all applications, like RF/microwave, antennas or planar problems. Participants will get understanding of HFSS modeling, solution process and post-processing features, which can be used for other advanced applications. The course will also cover advanced topics like dynamic link between EM and circuit, impedance matching, overview of HFSS 3Dlayout interface and speeding-up HFSS simulation using HPC.

7. Provide the needed tools for the complete simulation of a pressure Vessel from scratch. Several types of analysis and boundary conditions will be discussed, by using pressure vessels examples.

8.To acquire advance knowledge for performing mechanical simulation in Fixed Offshore Structures.

DEPARTMENT OF ELECTRICAL & ELECTRONICS

SUMMARY REPORT OF Electrical Installation Standards

The study of a proposed electrical installation requires an adequate understanding of all governing rules and regulations. A list of most common IEC standards is provided.

The total power demand can be calculated based on the location and power of each load, together with the knowledge of the operating modes (steady state demand, starting conditions, non simultaneous operation, etc.).

The power and number of sources required to supply the electrical installation is readily obtained, also taking into account local tariff structures, to allow the best choice of connection arrangement to the power-supply network, e.g. at medium voltage or low voltage level.

About the College:
An Institute committed to quality education **MIST** aims at providing learning with a technology edge. Right from its inception in **2001**, it has turning itself to meet this objective. It endeavors to provide consistent training to the students to help them evolve as competent professionals in the highly competitive world.

About the Department:
The Department of E.E.E is working with a mission to contribute through excellence in technical education, with research orientation. It imparts ethical & moral values to the student's so as to make them emerge as responsible professionals. With its experienced faculty members having excellent academic backgrounds, it trains students supplementing classroom lectures with computer aided demonstrations making their learning a rich and rewarding experience

Auto CAD SYLLABUS

1: Getting Started with AutoCAD

- Opening and Creating Drawings
- Exploring the AutoCAD interface
- Zooming and Panning

2: Basic Drawing & Editing Commands

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

8: Advanced Object Types

- Polylines

- Arcs
- Polygons
- Ellipses

9: Advanced Editing Commands

- Trim and Extend
- Fillet and Chamfer
- Polyline Edit and Spline
- Offset and Explode
- Join

10: Inserting Blocks

- The Insert Block Command
- Inserting Blocks with Tool Palettes
- Dynamic Blocs
- Migrating Blocks and other Elements between Drawings with Design Center

11: Text

- The Multiline Text Tool
- The Single Line Text Tool
- Editing Text
- Text in Model Space vs. Paper Space
- The Multileader Tool

12: Hatching

- The Hatch Command
- The Hatch Editor Ribbon Tab
- Saving and Applying Hatches with Tool Palettes

13: Adding Dimensions

- Using Dimensioning Tools
- Dimensioning in a Layout Tab vs. the Model Tab
- Using Dimension Styles
- Editing Dimensions

14.Projects - Annotating Your Drawing

- Dimensioning a Mechanical Drawing

CATIA COURSE
Summery

- In this course, you will learn how to utilize the core functionality enhancements in Catia.
- First, you will become familiar with using and customizing the new ribbon interface in Catia.
- The new measure and sectioning interfaces will also be examined. Next, you will become familiar with the Sketcher workflow and reference enhancements.
- Part modeling enhancements to features such as Extrude, Corner Chamfer, Sweeps, Blends, and Datum Curves will then be examined.
- You will also learn about new and enhanced Assembly capabilities, such as selecting multiple components, the new relationship constraints, and enhancements for dragging components.
- Then, you will examine the new Table and Balloon functionality for 2-D drawings, and review various detailing enhancements.
- At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Catia intended to evaluate your understanding of the course as a whole.

Technical Training Exam on ANSYS Software
(A.Y-2017-2018)

2x10=20 Marks

Answer All the Questions

1.

Given the 2D truss structure represented in Figure 1.1, where:

- h= 5 m
- L= 5 m
- F=1000 N
- E=1.0x10^5 N/m^2 (Young's modulus)
- A=0.1 m^2 (Cross-section area of each beam element)

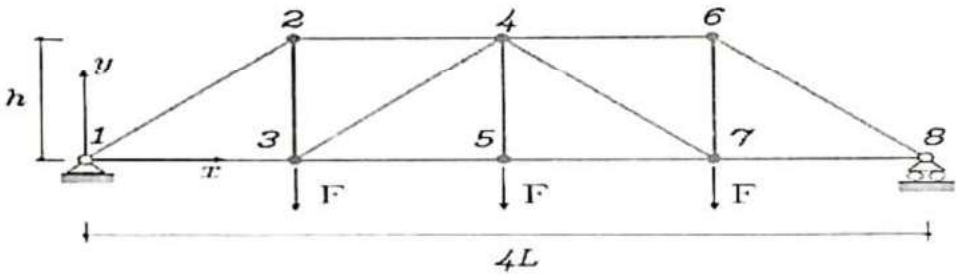

Figure 1.1: Example truss structure, constraints and loads.

2.

7.13 **Determine the stresses in the plate with the hole subjected to the tensile stress shown in Figure P7–13. Graph the stress variation σ_x versus the distance y from the hole. Let $E = 200$ GPa, $\nu = 0.25$, and $r = 25$ mm. (Use various mesh densities, depending on your computer program in your finite element model.) Use symmetry as appropriate.**

ANSYS COURSE
Summery

Department of Mechanical Engineering

1.The Geometry preparation training course is for users who want to create and modify geometry in preparation for CFD or FEA analysis. The training will be focused in either ANSYS Design Modeler or ANSYS Space Claim.

2. The ANSYS Meshing training course will give you the tools for generating good quality meshes for Fluent andCFX. The trainee will choose which tool should be used: ANSYS Meshing, Fluent Meshing or ICEM CFD

3. This course will show how to set up a range of simulation types in the ANSYS Fluent or ANSYS CFX solver, aswell as how to post process the results by using our CFD Post Tool.

4. This course will show how to set up a range of simulation types in ANSYS Mechanical, as well as how to post process and evaluate your results.

5. To acquire advance knowledge to perform explicit simulations with ANSYS Explicit STR, ANSYS AUTODYN or ANSYS LS-DYNA

6. This is an introductory to intermediate level training for using ANSYS HFSS for all applications, like RF/microwave, antennas or planar problems. Participants will get understanding of HFSS modeling, solution process and post-processing features, which can be used for other advanced applications. The course will also cover advanced topics like dynamic link between EM and circuit, impedance matching, overview of HFSS 3Dlayout interface and speeding-up HFSS simulation using HPC.

7. Provide the needed tools for the complete simulation of a pressure Vessel from scratch. Several types of analysis and boundary conditions will be discussed, by using pressure vessels examples.

8.To acquire advance knowledge for performing mechanical simulation in Fixed Offshore Structures.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

SUMMARY REPORT OF Training - C programming

C is robust **language** and has rich set of built-in functions, data types and operators which can be used to write any complex **program**.

Program written in **C** are efficient due to availability of several data types and operators.

C is good choice for system-level programming. Nevertheless, it is not perfect for all programmers and all situations.

C pointers are a common source of confusion and programming errors.

C also lacks explicit support for useful abstractions such as classes and objects.

That may be a reason C is not preferable language for application-level programming. Newer languages such as C++ and Java address these issues for application-level programs.

C programming language is not limited to but used widely in operating systems, language compilers, network drivers, language interpreters, and system utilities areas of development.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

SUMMARY REPORT OF Java Certification Programme

Java is one of the most popular programming languages used to create Web applications and platforms. It was designed for flexibility, allowing developers to write code that would run on any machine, regardless of architecture or platform

Java is designed to be concurrent, class-based and object-oriented, as well as a computing platform first released by Sun Microsystems in 1995. An enormous amount of applications and websites will not work unless you have Java installed, and more are created every day.

Java is advertised, and esteemed for its fast performance, security, and reliability.

SUMMARY REPORT OF Training - C programming

C is robust **language** and has rich set of built-in functions, data types and operators which can be used to write any complex **program**.

Program written in **C** are efficient due to availability of several data types and operators.

C is good choice for system-level programming. Nevertheless, it is not perfect for all programmers and all situations.

C pointers are a common source of confusion and programming errors.

C also lacks explicit support for useful abstractions such as classes and objects.

That may be a reason C is not preferable language for application-level programming.

Newer languages such as C++ and Java address these issues for application-level programs.

C programming language is not limited to but used widely in operating systems, language compilers, network drivers, language interpreters, and system utilities areas of development.

SUMMARY REPORT OF Java Certification Programme

Java is one of the most popular programming languages used to create Web applications and platforms. It was designed for flexibility, allowing developers to write code that would run on any machine, regardless of architecture or platform

Java is designed to be concurrent, class-based and object-oriented, as well as a computing platform first released by Sun Microsystems in 1995. An enormous amount of applications and websites will not work unless you have Java installed, and more are created every day.

Java is advertised, and esteemed for its fast performance, security, and reliability.

Course: Computer Aided Design CATIA – Intermediate

SUMMARY REPORT

CATIA Training. Computer Aided Design (CAD) is the use of computer software to design a product or an object. Computer Aided Engineering is the use of computer software to solve engineering problems and analyze products created using CAD. CATIA is an acronym for Computer Aided Three-dimensional Interactive Application

Overview: The Wireframe and Surface course is designed to teach you the basic wireframe and surface commands in CATIA V5-6 R2012. You more.We will learn how to create lines, points and planes in 3D space. You'll also learn how to create extruded and revolved surfaces from wireframe geometry and sketches.

SUMMARY REPORT OF CERTIFICATE COURSE ON ULTRASONICS

Ultrasonics, Vibrational or stress waves in elastic media that have a frequency above 20 kilohertz, the highest frequency of sound waves that can be detected by the human ear. They can be generated or detected by piezoelectric transducers (*see* piezoelectricity). High-power ultrasonics produce distortion in a medium; applications include ultrasonic welding, drilling, irradiation of fluid suspensions (as in wine clarification), cleaning of surfaces (such as jewelry), and disruption of biological structures. Low-power ultrasonic waves do not cause distortions; uses include sonar, structure testing, and medical imaging and diagnosis. Some animals, including bats, employ ultrasonic echolocation for navigation.

ETABS SYLLABUS

1: The knowledge about specialized software such as ETABS, SAFE to model and analyze for buildings.

2: Be able to model, analyze, and solve structural models on Specialized software and access analysis results such as force, Displacement and another parameter for structural design.

3: Be able to communicate and work in the group flexibly and Efficiently.

4: Explaining concepts, terminology and rules used in ETABS, SAFE software.

5: Modeling and analyzing type of simple and complex structural Systems.

6: Analyzing and determining the values of internal forces, Displacements and other parameters for structural design.

7: Working in the group to solve the problems relates to using Software ETABS, SAFE.

8: Choosing appreciable communication skills such as speech, Text, images, graphics, when expressing personal views.

CIRCULAR

Technical Training for IV B. Tech students are starting from 14th March, 2016 onwards.

All HODs and Placements coordinators have to manage the trainings and ensure 95% attendance all through the sessions.

All Mentors need to send the compiled feedback report to HOD at e3hod.civil@gmail.com daily.

Agenda: 1. Introduction to STAAD .Provi8.

STAAD.ProVi8 SYLLABUS

Chapter 1: Before you start using Bentley STAAD.ProVi8

a. Understanding Unit ConversionTables
b. Overview of Structural Design &Analysis
c. Stresses andStains
d. Shear Force & Bending MomentDiagrams
e. Introduction to Types ofStructures
f. Overview of Steel, Concrete and FoundationDesign
g. Introduction to Finite ElementAnalysis

Chapter 2: Introduction to STAAD.ProVi8

a. About BentleySTAAD.Pro
b. StartingSTAAD.Pro
c. Graphical UserInterface
d. Starting a NewProject
e. Working with UserInterface:
   - MenuBars
   - ToolBars
   - Tabs
   - Snap Node / BeamWindow
   - DataArea
   - MainWindow
f. Opening and ExistingProject
g. Saving aProject
h. ConfiguringUnits
i. KeyboardShortcuts
j. Importing Model inSTAAD.Pro
k. CoordinateSystemes

Chapter 3: Structural Modeling

a. Adding Beams using Tools
b. Creating Beams (Colinear, AlongAxes)
c. CreatingPlates
d. CreatingSurfaces
e. Creating SolidElements
f. CreatingStructure
g. Stretching and IntersectingMembers
h. Merging Members andNodes
i. Renumbering Nodes, Members andElements
j. Splitting and BreakingBeams
k. CuttingSections

Chapter 4: Material Constants and Section Properties

a. MaterialConstants
b. Creating and Editing MaterialProperties
c. Assigning Materials to theStructure
d. OrthotropicMaterials
e. SectionProperties
    - Prismatic Sections
    - TaperedSections
    - Steel Sections
    - Steel Joist and JoistGirders
    - Plate/SurfaceThickness

Chapter 5: Member Specifications and Supports

a. NodeSpecification
b. MemberSpecifications
    - Release
    - Offset
    - Property Reductionfactors
    - Cable
    - Truss
    - Compression
    - Tension
    - Inactive
c. PlateSpecifications
    - Release
    - Ignore InplaneRotation
    - PlaneStress
d. Supports:
    - Fixed
    - Pinned
    - FixedBut
    - Enforced
    - EnforcedBut
    - MultilinearSpring
    - Foundation
    - Inclined
    - Tension/Compression OnlySprings

Chapter 6: Loads

a. Types of Loads: Selfweight, Nodal, Member, Area, Floor, Plate, Surface andSolid,
b. LoadGeneration
c. LoadCombinations

Chapter 7: Performing Analysis

a. PreAnalysis
    - ProblemStatistics
    - JointCoordinates
    - MemberInformation
    - MaterialProperties
    - SupportInformation
    - Element & SolidInformation
b. PerformingAnalysis

Chapter 8: Post Processing & Report Creation

a. Post AnalysisPrint
    - LoadLists
    - JointDisplacement

PRINCIPAL
MAHAVEER
INSTITUTE OF SCIENCE & TECHNOLOGY
Bandlaguda, Hyd-500 005.

- MemberForces
- SupportReactions
- CG
- ModeShapes
- SectionDisplacement
- Analysis Results
- MemberStresses
- ElementForces/Stresses

b. ViewingResults
c. OutputFile
d. Post ProcessingMode

Chapter 9: Analysis Case Studies / Workshops

a. RCCDesign&Analysis(BeamsandColumns)
b. SteelDesign&Analysis(FramesandTrusses)
c. MiscellaneousAnalysis
d. Practice examples forStudents

Auto CAD SYLLABUS

1: Getting Started with AutoCAD

- Opening and Creating Drawings
- Exploring the AutoCAD interface
- Zooming and Panning

2: Basic Drawing & Editing Commands

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

8: Advanced Object Types

Mahaveer Institute of Science & Technology
Dept. of Civil Engineering

PRINCIPAL
MAHAVEER
INSTITUTE OF SCIENCE & TECHNOLOGY

- Polylines
- Arcs
- Polygons
- Ellipses

9: Advanced Editing Commands

- Trim and Extend
- Fillet and Chamfer
- Polyline Edit and Spline
- Offset and Explode
- Join

10: Inserting Blocks

- The Insert Block Command
- Inserting Blocks with Tool Palettes
- Dynamic Blocs
- Migrating Blocks and other Elements between Drawings with Design Center

11: Text

- The Multiline Text Tool
- The Single Line Text Tool
- Editing Text
- Text in Model Space vs. Paper Space
- The Multileader Tool

12: Hatching

- The Hatch Command
- The Hatch Editor Ribbon Tab
- Saving and Applying Hatches with Tool Palettes

13: Adding Dimensions

- Using Dimensioning Tools
- Dimensioning in a Layout Tab vs. the Model Tab
- Using Dimension Styles
- Editing Dimensions

14.Projects - Annotating Your Drawing

- Dimensioning a Mechanical Drawing

Revit COURSE
Summery

Department of Civil Engineering

- Use Revit for daily working process.
- Navigate throughout Revit using major navigating tools.
- Understand the concept and techniques to draw.
- Create multiple designs using several of tools.
- Create layers to control the objects' visibility.
- Explain drawing using annotations.
- Plot or print the drawing by scale.
- To use constraint for certain design.

CIRCULAR

Technical Trainings for III B. Tech students are starting from **07-02-2017** onwards. All HODs and placements coordinators have to manage the trainings and ensure 95% attendance all through the sessions.

All mentors need to send the compiled feedback report to HOD at e3hod.eee@gmail.com daily. Mentors are advised to take care of PNR (Students not participating in training).

Agenda: **Importancy of Earthing**

SUMMARY REPORT OF Importancy of Earthing

Earthing is **used to protect you from an electric shock**. It does this by providing a path (a protective conductor) for a fault current to flow to earth. It also causes the protective device (either a circuit-breaker or fuse) to switch off the electric current to the circuit that has the fault.

About the College:

An Institute committed to quality education MIST aims at providing learning with a technology edge. Right from its inception in **2001**, it has turning itself to meet this objective. It endeavors to provide consistent training to the students to help them evolve as competent professionals in the highly competitive world.

About the Department:

The Department of E.E.E is working with a mission to contribute through excellence in technical education, with research orientation. It imparts ethical & moral values to the student's so as to make them emerge as responsible professionals. With its experienced faculty members having excellent academic backgrounds, it trains students supplementing classroom lectures with computer aided demonstrations making their learning a rich and rewarding experience

SUMMARY REPORT OF Multisim Program

Objective: In the fast growing electrical field for understanding of installation of machinery, operation of any equipment, to do maintenance of any equipment and wiring of panel or buildings, knowledge of drawing reading and drawing making is required. For better understanding of various electrical circuit and working of components, knowledge of simulation software is required. Learning of software like CAD, PSIM and MULTISIM will enhance student's ability for working in this fast growing electrical market

About the College

*As an Institute committedtoquality education **MIST** aims at providing learning with a technology edge. Right from its inception in **2001**, it has turning itself to meet this objective. It endeavors to provide consistent training to the students to help them evolve as competent professionals in the highly competitive world..*

About the Department

*The Department of **Electrical &**Electronics Engineering was established in **2001** which offers **B.Tech, and M.Tech (POWER Engineering and Energy Systems)** courses with highly qualified, dedicated and motivated faculty. The courses and programmes offered by the department not only impart technical expertise to the students but also gives a professional experience.*

Auto CAD SYLLABUS

1: Getting Started with AutoCAD

- Opening and Creating Drawings
- Exploring the AutoCAD interface
- Zooming and Panning

2: Basic Drawing & Editing Commands

- Using the Mouse, Keyboard, and Enter Key to work quickly and efficiently in AutoCAD
- Lines
- Circles
- Rectangles

3: Projects - Creating a Simple Drawing

- Creating Simple Drawings
- Using Object Snap Tracking to extrapolate a projected top view
- Using Modify tools to arrange an office layout

4: Drawing Precision in AutoCAD

- Polar and Ortho Tracking
- Entering Coordinates and Angles
- Object Snaps and Tracking

5: Making Changes in Your Drawing

- Move
- Copy
- Rotate
- Mirror
- Scale
- Using the reference option with the Scale Tool

7: Organizing Your Drawing with Layers

- Layer States
- Properties by Layer
- Layer Tools

8: Advanced Object Types

- Polylines

- Polygons
- Arcs
- Ellipses

9: Advanced Editing Commands

- Trim and Extend
- Fillet and Chamfer
- Polyline Edit and Spline
- Offset and Explode
- Join

10: Inserting Blocks

- The Insert Block Command
- Inserting Blocks with Tool Palettes
- Dynamic Blocs
- Migrating Blocks and other Elements between Drawings with Design Center

11: Text

- The Multiline Text Tool
- The Single Line Text Tool
- Editing Text
- Text in Model Space vs. Paper Space
- The Multileader Tool

12: Hatching

- The Hatch Command
- The Hatch Editor Ribbon Tab
- Saving and Applying Hatches with Tool Palettes

13: Adding Dimensions

- Using Dimensioning Tools
- Dimensioning in a Layout Tab vs. the Model Tab
- Using Dimension Styles
- Editing Dimensions

14.Projects - Annotating Your Drawing

- Dimensioning a Mechanical Drawing

CATIA COURSE

Summery

- In this course, you will learn how to utilize the core functionality enhancements in Catia.
- First, you will become familiar with using and customizing the new ribbon interface in Catia.
- The new measure and sectioning interfaces will also be examined. Next, you will become familiar with the Sketcher workflow and reference enhancements.
- Part modeling enhancements to features such as Extrude, Corner Chamfer, Sweeps, Blends, and Datum Curves will then be examined.
- You will also learn about new and enhanced Assembly capabilities, such as selecting multiple components, the new relationship constraints, and enhancements for dragging components.
- Then, you will examine the new Table and Balloon functionality for 2-D drawings, and review various detailing enhancements.
- At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Catia intended to evaluate your understanding of the course as a whole.

Technical Training Exam on ANSYS Software
(A.Y-2016-2017)

2x10=20 Marks

Answer All the Questions

1. Given the 2D truss structure represented in Figure 1.1, where:

- h= 5 m
- L= 5 m
- F=1000 N
- E=1.0x10^6 N/m^2 (Young's modulus)
- A=0.1 m^2 (Cross-section area of each beam element)

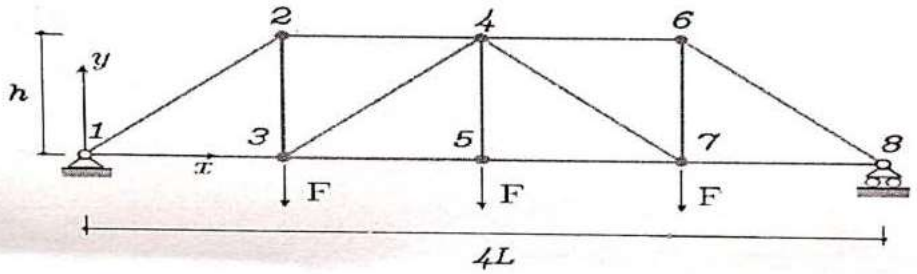

Figure 1.1: Example truss structure, constraints and loads.

2.

7.13 Determine the stresses in the plate with the hole subjected to the tensile stress shown in Figure P7–13. Graph the stress variation σ_x versus the distance y from the hole. Let $E = 200$ GPa, $\nu = 0.25$, and $r = 25$ mm. (Use various mesh densities, depending on your computer program in your finite element model.) Use symmetry as appropriate.

ANSYS COURSE
Summery

Department of Mechanical Engineering

1.The Geometry preparation training course is for users who want to create and modify geometry in preparation for CFD or FEA analysis. The training will be focused in either ANSYS Design Modeler or ANSYS Space Claim.

2. The ANSYS Meshing training course will give you the tools for generating good quality meshes for Fluent andCFX. The trainee will choose which tool should be used: ANSYS Meshing, Fluent Meshing or ICEM CFD

3. This course will show how to set up a range of simulation types in the ANSYS Fluent or ANSYS CFX solver, aswell as how to post process the results by using our CFD Post Tool.

4. This course will show how to set up a range of simulation types in ANSYS Mechanical, as well as how to post process and evaluate your results.

5. To acquire advance knowledge to perform explicit simulations with ANSYS Explicit STR, ANSYS AUTODYN or ANSYS LS-DYNA

6. This is an introductory to intermediate level training for using ANSYS HFSS for all applications, like RF/microwave, antennas or planar problems. Participants will get understanding of HFSS modeling, solution process and post-processing features, which can be used for other advanced applications. The course will also cover advanced topics like dynamic link between EM and circuit, impedance matching, overview of HFSS 3Dlayout interface and speeding-up HFSS simulation using HPC.

7. Provide the needed tools for the complete simulation of a pressure Vessel from scratch. Several types of analysis and boundary conditions will be discussed. by using pressure vessels examples.

8.To acquire advance knowledge for performing mechanical simulation in Fixed Offshore Structures.

SUMMARY REPORT OF Technical Training MS-Office

The purpose of the **MS Word** is to allow the users to type and save documents. ...

Microsoft **word** is used to save documents.

The documents can be copied to flash drive which serves as an external memory for your computer.

This allows you to use the saved documents conveniently taking with you anywhere.

MS Excel is a spreadsheet programme developed by Microsoft in 1985, with the sole purpose of helping businesses compile all their financial data, yearly credit, and yearly debit sheets.

Fast forward to the future after 31 years, it is now the most commonly used program for creating graphs and pivot tables.

Making your presentation more interesting through the use of multimedia can help to improve the audience's focus.

PowerPoint allows you to use images, audio and video to have a greater visual impact.

These visual and audio cues may also help a presenter be more improvisational and interactive with the audience.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

SUMMARY REPORT OF Cloud computing

Cloud computing is perhaps the most flamboyant technological innovation of the 21st century. This is because it has seen the fastest adoption into the mainstream than any other technology in the domain.

This adoption has been fueled mainly by the ever-increasing number of smart phones and mobile devices that can access the internet.

Cloud computing is not just for organizations and businesses; it's also useful for the average person as well.

It enables us to run software programs without installing them on our computers; it enables us to store and access our multimedia content via the internet, it enables us to develop and test programs without necessarily having servers and so on.

Hadoop is an open source platform that provides excellent data management provision.

It is a framework that supports the processing of large data sets in a distributed computing environment.

It is designed to expand from single servers to thousands of machines, each providing computation and storage.

Its distributed file system facilitates rapid data transfer rates among nodes and allows the system to continue operating uninterrupted in case of a node failure, which minimizes the risk of catastrophic system failure, even if a significant number of nodes become out of action.

CIRCULAR

Technical Trainings for III & IV B. Tech students are starting from 10-09-2016 onwards. All HODs and placements coordinators have to manage the trainings and ensure 95% attendance all through the sessions.

All mentors need to send the compiled feedback report to HOD at e3hod@gmail.com daily. Mentors are advised to take care of PNR (Students not participating in training).

Agenda: **PC Hardware and Networking**

SUMMARY REPORT OF Technical Training MS-Office

The purpose of the **MS Word** is to allow the users to type and save documents. ...

Microsoft **word** is used to save documents.

The documents can be copied to flash drive which serves as an external memory for your computer.

This allows you to use the saved documents conveniently taking with you anywhere.

MS Excel is a spreadsheet programme developed by Microsoft in 1985, with the sole purpose of helping businesses compile all their financial data, yearly credit, and yearly debit sheets.

Fast forward to the future after 31 years, it is now the most commonly used program for creating graphs and pivot tables.

Making your presentation more interesting through the use of multimedia can help to improve the audience's focus.

PowerPoint allows you to use images, audio and video to have a greater visual impact.

These visual and audio cues may also help a presenter be more improvisational and interactive with the audience.

DEPARTMENT OF INFORMATION TECHNOLOGY

SUMMARY REPORT OF Cloud computing with HADOOP FRAMEWORK

Cloud computing is perhaps the most flamboyant technological innovation of the 21st century. This is because it has seen the fastest adoption into the mainstream than any other technology in the domain.

This adoption has been fueled mainly by the ever-increasing number of smart phones and mobile devices that can access the internet.

Cloud computing is not just for organizations and businesses; it's also useful for the average person as well.

It enables us to run software programs without installing them on our computers; it enables us to store and access our multimedia content via the internet, it enables us to develop and test programs without necessarily having servers and so on.

Hadoop is an open source platform that provides excellent data management provision.

It is a framework that supports the processing of large data sets in a distributed computing environment.

It is designed to expand from single servers to thousands of machines, each providing computation and storage.

Its distributed file system facilitates rapid data transfer rates among nodes and allows the system to continue operating uninterrupted in case of a node failure, which minimizes the risk of catastrophic system failure, even if a significant number of nodes become out of action.

Course :Multi rotor Drone Pilot Course

Report summary

A multirotor or multicopter is a rotorcraft with more than two lift-generating rotors. An advantage of multirotor aircraft is the simpler rotor mechanics required for flight control. Unlike single- and double-rotor helicopters which use complex variable pitch rotors whose pitch varies as the blade rotates for flight stability and control, multirotors often use fixed-pitch blades; control of vehicle motion is achieved by varying the relative speed of each rotor to change the thrust and torque produced by each.

There are four main physical types of professional drones: multi-rotor, fixed-wing, single-rotor helicopter, and fixed-wing hybrid VTOL. The different body styles of each type of drone contribute to the amount of weight they can carry (payload), efficiency and duration of the flight.

SUMMARY REPORT OF CERTIFICATE COURSE ON ATOMIC STRUCTURE

Atoms consist of protons and neutrons in the nucleus, surrounded by electrons that reside in orbitals. Orbitals are classified according to the four quantum numbers that represent any one particular orbital's energy, shape, orientation, and the spin of the occupying electron. The first section of this SparkNote on Atomic Structure will focus on the electron and the mechanism of describing electrons and their orbitals.As we shall see in the second section, electrons fill up orbitals in a systematic fashion, following the rules of the Aufbau principle. The configuration of electrons in an atom play a vital role in chemistry. Virtually every chemical process relies on the interactions of electrons between atoms, most particularly on the tendency of atoms to follow the octet rule, the tendency to gain a full valence shell electrons. In the second section of this SparkNote, we will discuss the properties of electrons, distinguishing between valence electrons and inner electrons, then broadening the discussion into an examination of the properties of electron conifgurations.
