STUDENTS 2021**

**Department of Humanities & Sciences**  
*Bridge Course- 2021*

**Course Duration: 2 weeks**

**(21.12.2020-05.01.2021)**

## Introduction

The Bridge Courses are the foundation classes organized for I B. Tech. Students. By conducting an assessment test in their respective subjects. This course helps students from rural backgrounds and will brush up on their academic knowledge. Every student, on admission, would be put through mandatory induction training to reinforce the fundamental concepts and the required language skills for technical education.

The genesis of this module lies in the Induction Program, first conceived and started by (MIST) in 2016 on a mass scale for about 700 students. The fact is that the students are overburdened and stressed out due to hectic high school life. To refresh their creative mind, they have been exposed to month-long diverse credit courses like Physical Education, Human Values, Creative practices, and several non-credit informal activities. In a welcome step, the AICTE has proposed to extend this program to the Engineering Colleges affiliated with them.

The main objective of the course is to bridge the gap between subjects studied at the Pre-university level and subjects they would be studying in engineering. ... Bridge Course will help the students to have a smooth transition to the Engineering course

Consequently, after the completion of the 2-weeks induction program, it is proposed that (besides other subjects) bridge courses in basic English, Physics, Chemistry, and Mathematics should be taught to these students for the rest of the semester. The bridge courses will cover typical weaknesses of students in science at the 10+2 level. The concerned University/institution has the flexibility to adapt these modules on bridge courses by adjusting teaching hours accordingly.

## Mathematics Bridge Course -2021

Mathematics is the language of Engineering and the Queen of all Sciences. In all the B.Tech disciplines, it is one of the basic and most important subjects in the engineering curriculum. The sad reality of today is that most students who have been through the pre-university courses and 10+2 mathematics have no conceptual understanding of the subject matter. Mathematics is usually reduced to a procedural application of formulas and methods.

At MIST, newly admitted students are put through a bridge course that prepares them both on skillset and their knowledge base with this background. This course is conducted by the Department of Mathematics, which makes it mandatory for all MIST students with less than 50% in mathematics to attend this course. This **two-week** bridge course aims to skill improvement and more profound enrichment of the concepts encountered, making mathematics a more exciting subject than the chore it usually has become.

### **The aim of the Bridge course in Engineering Mathematics is**

1. To understand " Mathematics as a discipline and not as a subject".
2. To Bridge "the School education and Engineering education".
3. To make "learning of Mathematics as a pleasant experience".

Starts from **21.12.2020** to **05.01.2021** at the Seminar Hall, Mahaveer Institute of Science and Technology, Bandlaguda, Hyderabad. The course is designed and conducted by the Department of Mathematics.

*Mathematics Syllabus– 12 Hrs.*

**Algebra**

- Algebraic Equations, Partial Fractions,
- Synthetic Division, Factorization,
- Elementary Row transformation.

**Differentiation – I**

- Derivatives of all elementary functions, Rules of differentiation.
- Derivative of sum, Difference, product rule, quotient rule.
- Derivatives of composite functions-chain rule, Derivatives of hyperbolic functions
- Derivatives of inverse trigonometric functions by substitution

**Integration**

- Integral of a function, Standard forms of the integral calculus.
- Definite Integrals, Integrals reducible to standard forms by substitution
- Integration by partial functions, Integration by parts, and Bernoulli's Rule.

## *Warm-up*

### **Objectives:**

- Creating a love for the language
- Explaining the Significance of the language
- Building Self-confidence for using the language for functional purposes.

### **Teaching Materials:**

Video Clips – Youtube

Film Clips (The King's Speech, Pursuit of Happiness, etc) Lyrics

### **Teaching Methods:**

Screening of film clips and  
videos Listening to lyrics

### **Home Tasks:**

Watching selected English films and video  
clips Watching English TV channels  
Reading newspapers, magazines, best selling writings

## Session-3

### Listening

#### Objectives:

- To enable learners to listen to different kinds of listening texts
- To familiarize learners with different accents
- To train learners to listen for specific details and gist

#### Materials:

Audio files, TV programs, Video Clips of Speeches. Narration, Short-lectures, Conversations

#### Teaching Methods:

Pre-listening, While-listening and Post-listening tasks

Discussion based on the materials

Worksheets based on the listening texts / descriptive Q&A

#### Home Tasks:

Paraphrasing and Summarizing of listening materials from varied sources

## Feedback from 2021 Batch

I had joined a bridge course before commencement of the college as it was told that it would help me during my college days, and it was very helpful for me. The education gap between PUC and Engineering is too large and the bridge course is the way to fill that gap difference as the faculty taught us the basics of engineering subjects like mathematics, computer. the faculty even taught us how to use the scientific calculator without it, it would have been very difficult to solve problems with the help of the calculator. The Bridge course was not only about studies it also had the project hour where I learned many new concepts related to science. Because of the bridge course, I even made new friends. I enjoyed it a lot during the bridge course and I will recommend my juniors to join the bridge course as it will be very helpful for them in the same way as it has helped me.

**P. Tarun -CSE**

---

The Bridge course bridged the difference between the Pre-University curriculum and the engineering curriculum. It helped the students to adapt themselves to the campus environment.

The one-month course consisted of theory sessions of Mathematics and insight about C programming, which was a mysterious subject to the students of biology background. Apart from the theory sessions, we attended the fun-filled Project hours guided by the DT Labz. They introduced us to the technical aspects of gadgets, which we were unaware of. Project hours gave us hands-on experience, which we lacked during our Pre-University Education. We also attended a few guidance seminars on how to efficiently plan the next four important years of our life.

The Bridge Course transformed the raw, confused entrants into confident prospective engineers ready to absorb the knowledge of the vast field of engineering. By the end of the course, I felt we couldn't have had a better way to utilize our holidays before the beginning of the course.

I would love to recommend my juniors to join the Bridge Course, which would help them to enrich their knowledge and hone their skills as it did to me.

**D.Vinaya- AERO**

Initially, I attended the Bridge Course as everyone told me it was a good idea to do so. Although at the time I felt sad that I had given up my last month of vacation for the Bridge Course, now looking back at it, I don't regret it. Not even a bit.

The major effect that the Bridge Course had on me was the confidence that I gained. The first day of college was a fear in my heart at first. Especially because I didn't know anyone and the local language and I was far away from home. I met most of the faculty during the Bridge Course and their classes were helpful. Since I took Computer Science basics of C Language which was taught during the Bridge Course.

But for all those who had taken Biology, those classes were a major help. We even got to meet a few of our seniors through those sessions. That was when I realized that seniors were friendly and we didn't have to worry about them or any ragging. We were even able to build our remote-controlled or automated robots by the end of the Bridge Course. But the best part was when I came to this college I didn't have even one person to call a friend but at the end of the Bridge Course, I had two classes full of students who attended the Bridge Course that I could call my friends.

The Bridge course was a 2-week course. It was a very useful session for me. I had been the opportunity to execute my talent and along with academics with a lot of interactive activities. This bridge course stressed motivation, individual attention, and development of self-confidence, and special method of teachings. Also, it gave me basic knowledge to get prepared for engineering courses. Sessions were conducted on how to go further with the project & research. Interactive videos about the projects and designing of branded vehicles that I was not aware of had been shown. The students are monitored constantly to overcome their weaknesses and are made ready for B.Tech. first year.

The bridge course which I attended had benefited me in many ways. It helped me clear my first semester exams with FCD. The bridge course taught me how to work on projects and it also helped me socialize with people which all over boosted my confidence. I am benefitted by this bridge course provided by the college.
